**CeroView Delivers Student Kiosks**

01-27-2003 --

CeroView, a leading provider of turnkey kiosk solutions, today announced the final delivery and installation of a kiosk network to Bastyr University.

CeroView delivered 12 of its **DIVA** kiosks to Bastyr University. The DIVA kiosk is popular with clients who are seeking to supply their own equipment and under a very strict budget. Bastyr University is using the systems in public areas for student's who want to register for classes, check grade status, conduct in-depth searches in the University's Library catalogue and other related self-service transactions.

"Bastyr University is a fairly typical educational client. They've invested in a sophisticated Internet and Intranet portal and are looking at ways to broaden its reach to the student base and other campus visitor's," states Derek Fretheim, CeroView's President. "Bastyr really didn't have a tremendous amount of capital and were set on using over the counter equipment provided by DELL Computers. They didn't have much to spend, but wanted kiosks so we suggested our **DIVA** model." Bastyr has strategically placed kiosks in key access areas on the campus and report heavy usage by students.

Founded in 1978 as a college of naturopathic medicine, Bastyr University ([www.bastyr.edu](http://www.bastyr.edu)) is located north of Seattle, Washington. Bastyr is one of the world's leading academic centers for advancing knowledge in the natural health sciences. A two-decade pioneer in natural medicine, Bastyr continues to be in the forefront of developing the model for 21st century medicine. Bastyr University's mission is to educate future leaders in natural health sciences that integrate mind, body, spirit and nature.
